

QUALITY POLICY

MAFA BIOSCIENCE, S.A. company focused on the design and production of fertilizers and complementary products, decided to set up a quality management system according to international law UNE-EN ISO 9001:2015 and the Real Decreto 506/2013 regarding fertilizers products through the following guidelines:

- Accomplishment of all the requirements pertinent to our products as well as all the requirements from our customers and other interested parties.
- Studying the needs and suggestions from our customers by collecting information and contacting them as well as studying our context in order to improve continuously.
- Planning and controlling the production of fertilizer references in order to achieve maximum customer satisfaction.
- Employment of facilities, equipment and machinery suitable for manufacturing.
- Encouraging the participation of staff, increasing the motivation of the team through communication, training and treatment of skills, knowledge and awareness.

MAFA BIOSCIENCE, S.A. maintains a commitment to continuous improvement of the quality management system and establishes coherent and measurable quality objectives which are periodically reviewed.
